INSTALLATION AND DISMANTLING OF MACHINERY AND STRUCTURES

INDUSTRIAL RIGGING

One of the most hazardous operations in the industry is rigging and material lifting with cranes and other hoisting devices. Rigging works include a wide range of technological operations necessary for the transfer of heavy and over-sized objects.

Unlike standard loading and unloading operations, rigging works are not possible without using special devices and mechanisms intended for safe transfer of various cargo. All rigging activity no matter the magnitude and scope requires planning, implementation of and the use of basic rigging safety techniques and work practices.

INSTALLATION AND DISMANTLING WORKS

Operations related to assembly and disassembly of various types of nodes, mechanisms and elements of structures can be carried out using rope access method as well as relevant machinery and equipment.

Installation and dismantling works carried out by Gridinta specialists in various industry sectors:

- Steel and reinforced concrete structures
 - Pipelines
 - Brick, reinforced concrete and metal chimneys
 - Cell towers and antennas
 - Tent coverings
 - Various equipment and machinery
 - Roof constructions
 - Building, stadium, hangar membranes
 - Rockfall protection, net installation
-

OTHER WORKS AT HEIGHT

There is a large number of various specific works which are difficult to classify as they are non-standard according to their specifics.

Highly qualified industrial climbers: fitters, welders, sandblasters, painters, electricians, metalworkers, riggers, non-destructive testing and other specialists hold IRATA certificates of different levels, which enable Gridinta to perform all types of work at heights by using the rope access method. Our industrial climbing experts with a long-standing expertise of working at height ensure that every project is held up to the highest quality and safety standards.

CERTIFICATES

Gridinta technicians hold all necessary certifications to ensure efficient flow of procedures as well as the adherence to health and safety regulations at the work place.
