PAINTING AND BLASTING

SURFACE PREPARATION

Painting with a carefully prepared surface is the easiest and cheapest way to prevent corrosion, extending the useful lifetime of costly buildings, structures and equipment.

At Gridinta every painting project starts with an analysis and examination of the surface and its environment. After evaluating the contamination and other issues in effect, Gridinta specialists determine the type of cleaning method required for the project. Each project is addressed by following a strict procedure set by international standards for surface preparation.

Services:

- High pressure washing
 - Mechanical cleaning
 - Sand, grit, wet blast cleaning
-

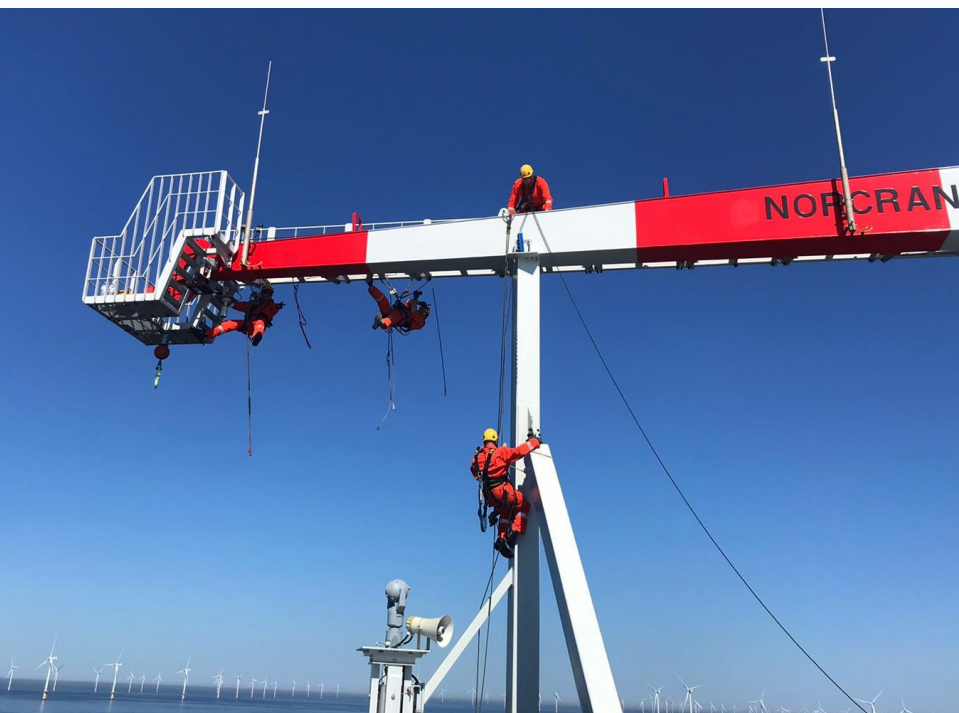

PAINTING

Painting works carried out on buildings, bridges, towers, offshore rigs and other structures, whether the project requires the use of rope access methodology or not, are implemented by using a specific set of skills and a strict work ethic dictated by safety and security standards.

Gridinta experts are fully trained and equipped with all the necessary tools that allow them to achieve quality finish for any painting project.

Painting works at even the most difficult to access areas using:

- Fire-resistant paint
- Industrial paint
- Roller painting, spray painting and other techniques
- Logo and distinctive mark application methods

CERTIFICATES

Our rope access technicians are IRATA (Industrial Rope Access Trade association) certified.

Gridinta technicians also hold all other necessary certifications to ensure efficient flow of procedures as well as the adherence to health and safety regulations at the work place.
